The question of a grant for the construction of a Municipal School at Domlur was put forward in 1934 and again in 1935. On both these occasions the Inspector was informed that a grant could not be sanctioned.

In their Resolution adopted at a meeting held on the 30th April 1936, the Municipal Commission have resolved that Government be requested to meet half the cost of the work (Rs.2150/). The Inspector while supporting the request of the Commission finds that it will not be possible to meet the grant from the normal annual provision made for building grants to Aided Elementary Schools.

If approved the Inspector may be told that, in view of the present state of the M.A.T. ~~budget~~ finances, the request cannot be complied with. Subject to approval a draft is submitted.

12 JUNE 1936

Letter No. 6848/33, dated 6-6-1936 from the President, Municipal Commission, requesting that sanction may be accorded for a half grant from Government Funds towards the cost of constructing a building for the Domlur School.

1215-35

Forwarded to the Secretary to the Hon'ble the Resident in Mysore, Bangalore.

2. It will not be possible to meet the grant from the normal annual provision made for building grants to aided elementary schools, but the request made is not unreasonable, and is supported, funds permitting. There is very real need for a new building for the school.

SIR,

Subject:- Construction of a building for the Municipal Boys' School at Domlur.

In enclosing a copy of the Municipal Commission's Proceedings No.3, dated the 30th April 1936, in respect of the construction of a new building for locating the Municipal Boys' School at Domlur, which is now held in a building which is unfit for a school, I have the honour to request that the Hon'ble the Resident be moved to accord sanction to the payment of at least half the cost of the work, in accordance with the usual procedure followed by Government in the matter of construction of buildings and other original works by the Management of Aided Schools in the Station. The Commission were under the belief that Government would bear the full cost in accordance with the usual practice in the past, the only exception being the recent construction of a school at Pottery Town the cost of which was met from the "Rents from settlements", as it was considered to be a legitimate charge on those funds. In the circumstances, I request that the Municipal Schools may be treated as at least on a par with the Aided Schools and sanction accorded to meet half the cost as suggested by the Municipal Commission in their resolution.

I have the honour to be,
Sir,
Your most obedient servant,

President, M. C.

MVL.

3. Consideration of the question of constructing a building for the Municipal Boys' School at Domlur at Municipal cost.

Recommended that the school be built, funds to be provided out of the reserve for capital works.

The President said that he did not know how many of them had seen the school building at Domlur before the proposition to construct a new building had been brought up. The school was located in a rented building and was in a most dilapidated condition, ill-ventilated and over-crowded. In his opinion, it was not at all fitting that the school should be held in those premises and so the Educational Sub-Committee had proposed that a new school might be built. On considering the question carefully, the Standing Committee had recommended that a new school should be built, the funds for the same to be provided from Municipal revenues out of the reserve for Capital Works. Hitherto, they had been able to get a Government grant for building new schools, but unfortunately they could no longer rely on a grant from that source when building new schools and so they had to build their own schools out of Municipal funds.

Mr. Abdul Latheef said that the capital charge for all Municipal schools should be met from Government grants. They should remember that the school recently built at Pottery Town had been built purely out of Municipal funds, and now they proposed doing the same thing with the Domlur School. In preparing the budget, the Inspector of Schools could easily make provision of funds for new Municipal School buildings. They were constantly building schools out of their funds on promises made that the money would be recovered from Government, but no effort had yet been made to get that money already spent. Since the Inspector of Schools was present at the meeting, he might be asked if provision could not be made for a grant from Government for the school proposed to be built at Domlur.

The President asked the Inspector of Schools if he was familiar with the Budget that had been prepared before he took over charge in Bangalore.

The Inspector of Schools replied that he was sorry he was not able

to give the Commission any information on the subject, as the budget had been prepared before he assumed charge.

Mr. Abdul Latheef observed that for the past 2 years the Government had not been able to give them any grant for new schools because no provision had been made in the Budget. It was the duty of the Inspector of Schools to recommend the provision of money for inclusion in the Government Budget. Although the Commission were always willing to advance the money for the construction of new schools, some effort should be made to see that they got that money back.

The President said that the Commission had had grants from the Government in the past, but it seemed to be no longer possible to get grants from Government for the purposes of constructing new schools.

The Vice-President said that the grants referred to by Mr. Abdul Latheef were those that were given by Government for constructing Municipal Schools under the 5-year programme. When the Commission proposed constructing a new building and locating a school at Pottery Town, the Government would not give them any grant and he was sure that they would give no grant for the school proposed to be built at Domlur either. The only thing they might do, was to ask the Government for a grant amounting to half the amount, as was done in the case of Aided Schools. The school in question was in a most disgraceful condition and whether they paid for the whole construction or half of it, a new school had to be built for that locality.

The President said that, on behalf of the Inspector of Schools and himself, he would assure the Commission that they would do their utmost to get a grant from Government for the construction of the school in question. He would say, however, that if they got half the amount, as suggested by the Vice-President, they should consider themselves very lucky indeed. In view of that, however, it would be better to alter the recommendation and say that the Commission would pay the cost of the work for the present and request the Government to refund half the amount later.

Mr. Abdul Latheef said that there would be no harm in the Commission offering to pay for the whole construction immediately out of their funds and asking the Government to pay them the other half, as was done in so many other cases.

The President read out the recommendation in the form in which it was altered, in the light of his remarks, and put it to the meeting

and it was carried.

Resolved that a building be constructed for the Municipal Boys School at Domlur and that the Government be requested to meet half the cost of the work. The Commission's share to be provided out of the reserve for Capital Works. Pending sanction of grant by Government, the work should be carried on at Municipal cost, as the present building is unfit for a school.
